

Healthcare AWS Power BI KPI Definitions

Revenue Cycle

Total Charges

- Sum of all billed amounts (what the provider charged) for the selected time period and filters.

Total Allowed

- Sum of allowed amounts (what the payer says is eligible after contracts/fee schedules). This is the negotiated amount, not the original charge.

Total Paid

- Sum of payer-paid amounts applied to the claim. This reflects what the insurer actually paid (often excludes patient responsibility like copay/coinsurance/deductible).

Denial Rate

- Percent of claims or claim lines that were denied.
- Formula (most common): $\text{Denied claim lines} \div \text{Total claim lines}$.
- Dollar-based option: $\text{Denied allowed amount} \div \text{Total allowed amount}$.

Utilization and Quality

Total Encounters

- Count of all patient visits/encounters in the selected period (all encounter types combined).

Inpatient Encounters

- Count of encounters where the patient was admitted to the hospital (encounter type = Inpatient).

ED Encounters

- Count of Emergency Department encounters (encounter type = ED).

Avg LOS (Days)

- Average length of stay for inpatient encounters.
- Formula: $\text{Average of (Discharge date - Admit date) in days}$.

30D Readmit Rate

- Percent of inpatient discharges followed by another inpatient admission within 30 days.
- Formula: $\text{Readmissions within 30 days} \div \text{Total inpatient discharges}$.

Patient Experience and Quality

Weighted Top Box %

- Percent of survey responses that fall in the highest rating category (“top box”), weighted to reflect the scoring approach you use (by question/domain and/or response volume).
- Example top-box responses: “Always”, “Yes”, or “9–10”.

Respondents

- Count of completed, valid survey responses included in the score.
- Domain scores (what each represents)

Cleanliness

- Top-box percent for questions about how clean the room and bathroom were.

Communication with Doctors

- Top-box percent for doctor communication questions (listening, explaining, respect).

Communication with Nurses

- Top-box percent for nurse communication questions (courtesy, listening, explaining).

Discharge Information

- Top-box percent for discharge instructions and understanding after leaving.

Quietness

- Top-box percent for how quiet the area around the room was at night.

Recommend Hospital

- Top-box percent for “Would you recommend this hospital?”

Overall Rating 9–10

- Percent of respondents who gave the hospital an overall rating of 9 or 10.
